

## RELEVANT PRACTICE IN WORK-BASED LEARNING (1)

### COUNTRY

Italy

### FOCUS

Training centre

### DESCRIPTION

I.I.S Des Ambrois is supported by the Catalan school Joan Brudieu (La Seu d'Urgell) for the project "NEWLY-GRADUATED TALENTS".

Every year the school sends five to seven students abroad for a summer twelve week work placement. These students have taken their Upper Secondary School State Certificate (diploma) in the year of their mobility (beginning of July). Before any work placement the school asks the foreign partner to send us a letter of intent in which they accept to organize it and enclose a cost estimate of room and board together with the cost of the tutor in case of emergencies. When the funding has been approved, the school starts to select the candidates considering their motivation, reliability, school grades and the social and financial situation of their families.

During their work placement we keep in touch with the students and the tutor provided by the foreign partner. No other inspection is expected. After their mobility the students must prepare a report about their experience, justify every expense through receipts, transport and museum tickets, hand in a copy of the report written by the company tutor. In addition to the letter of intents and the cost estimate, we sign an official agreement with the foreign partner. The students have to fill in a form provided by the partner school.

### WHY CAN IT BE CONSIDERED A GOOD PRACTICE?

The project gives the students the opportunity:

1. to have a job experience in an international environment
2. to improve their language competence
3. to live in a different country autonomously.

This programme is specific for students who have already taken their final state exam. When they fill in their CV they usually include this mobility and enclose the letter of the company tutor containing the assessment of the work done.
