EROVET Innovation platform

ENTREPRENEURSHIP

PARTNERS OF THE EROVET PROJECT

Innovation platform link: <https://erovet.eu/resources/services/innovation-platform/>

An **Innovation platform** where joint innovative projects developed by learners in the partnership can be uploaded. The platform is also the means to find mentorship, financial support or practical support to improve or develop the projects.

There are three categories now available: “Find a challenge”, “Share your idea” and “Sponsor a project”:

Select a category

Choose a community to browse its collections.

Find a challenge

Would you like to take part in a real-life project? Follow the challenges launched by the companies!

Share your idea

Do you have an idea for a great project? Do you need partners to work with you?

Sponsor a project

Would you like to sponsor a project? Would you like to contribute to make an idea a reality?

The main objective for the creation of the Innovation Platform is to enable broader support and more success opportunities.

- **Find the challenge:** participants can be part of a real life project following challenges launched by companies. The established information that must be provided is: Field, Company or Institution, Country, Challenge (in English) and Contact mail.

[Ideas for a project](#)
Document with a brief description of project idea

- **Sponsor a project:** where companies can contribute to make an idea come true by financing a project.

A representative from each center can publish the entrepreneurship projects that students have worked on. The aim is to have a catalogue of entrepreneurial ideas that companies can check and to give the students the opportunity to go ahead with that business idea.

This image shows how companies will be able to see project documentation and filter among issue date, author, title and subject.

Title: Shake&Drink - Elaboració i anàlisi de sucres naturals potencials amb superaliments

Authors:

Issue Date: 2022

Abstract: The last project of the course consists of a personal challenge, where the topic will be chosen by each group of students and where a complete research project must be carried out with its planning, experimental execution, writing and defense. In this project we wanted to focus on natural fruit juices. We wanted to create an innovative product, 100% natural, adding superfoods to enhance it and then do the corresponding analyses to observe the nutritional value provided by the supplement and its ingredients, and also see the acceptance of the public to create product and marketing lives. We made 2 different types of juice. The first is with probiotics (with fermented cabbage) and the second we've added Chloroel, a seaweed full of chlorophyll with a purifying effect that also provides an important dose of minerals and vitamins.
