EROVET Celebrating Europe

ENTREPRENEURSHIP

PARTNERS OF THE EROVET PROJECT

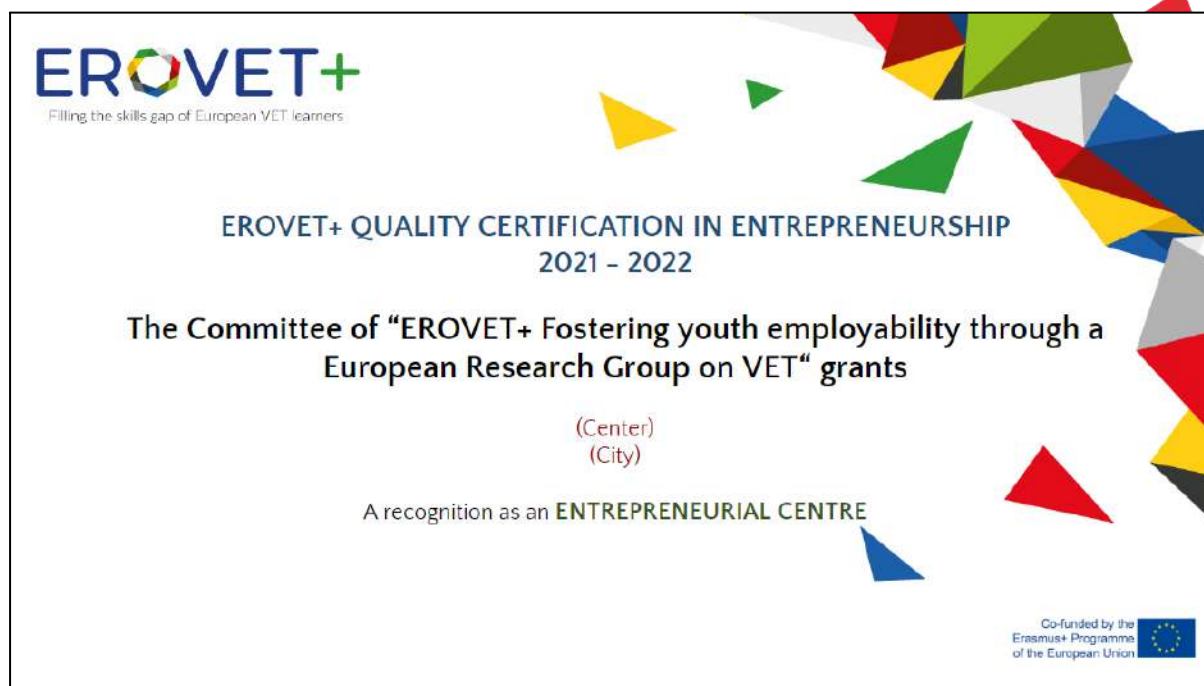

During the first week of May, a closing event took place in Lleida. It was a special celebration with students, teachers and companies to recognize the work of EROVET, also the individual institutions and most importantly, the students' projects.

Two students from each country took part in the event, **showcasing their best project** (from EROVET Together) and presented it to the audience and the judging panel, after receiving training on elevator pitches and using technology to present their ideas during that week. The projects are uploaded on the EROVET Innovation Platform to enable broader support and more success opportunities.

The conclusion to all this was an **award of student's projects** and prize giving ceremony, where The Committee of EROVET+ grants all centers with the recognition as an Entrepreneurial Center by delivering an **Entrepreneurship label**:

This label (that might be placed on all the centers walls) recognizes all EROVET+ partners as Entrepreneurial centers, in which they can develop entrepreneurial training. By certifying those centers, EROVET+ project is boosting the spirit of self-employment among entrepreneurs, inculcating the entrepreneurial skills to potential entrepreneurs and enabling the entrepreneurs to define or redefine their business objectives.

Once the EROVET+ partners received this accreditation, the assistants witnessed a **lecture** by Mr George Hayes, ***A world in Union***, with the objective of placing importance on opening the barriers between countries in contexts such as: internal markets, technological process, social justice, entrepreneurship projects development, education or cultural respect.

The event was not only important to strengthen the Project ties but also to expose the alliances among the external stakeholders who came to the event. As EROVET+ collaborators still wish to respond to the addressed needs, the skills challenges and ongoing economic changes. It is meaningful to promulgate ourselves on our closing network as the external stakeholders are our potential aid.
